Senior Fellow Blogs About Arduino

A blog written by Jim Town was published by Make magazine. The blog discussed how he incorporated Arduino, an open-source electronics prototyping platform based on flexible, easy-to-use hardware and software, to engage students in his math classes. Previously a math teacher at West Sacramento Prep, Town is currently working at the National Science Foundation as an Einstein Distinguished Education Teaching Fellow, in the Division of Research on Learning (DRL) at the Directorate for Education and Human Resources.
